COLLECTIONIST DRESSER

LAURAMERONI
design . collection

Wood veneered sideboard with 7 hinged doors and rounded sides, equipped with 8 internal drawers and shelves. It is available with brushed brass legs or in the hanging version and it is realized only with Siberian ash finish. It is also available in combination with Sesel Collection bronze handles.

Whether you are a collector or not, everyone is surrounded by little everyday objects or precious things, important in our life, but which often we don't know where to keep safe and where to find them.

Collectionist Design is inspired by the secretaire of last centuries: a furniture which contains, organizes and conserves items and documents in its internal little spaces.

The wall unit is an invitation to touch the rounded surfaces and appreciate the bronzed handles which give to this piece an artistic value.

Collectionist is a unique and elegant wooden sideboard, characterized by curved lines and fitted with internal shelves and drawers to offer a sophisticated and functional product.

It is available in combination with Sesel bronze handles, for a product which is unique and immediately recognizable.

Collectionist sideboard is available in the hanging version and in combination with Sesel handles.

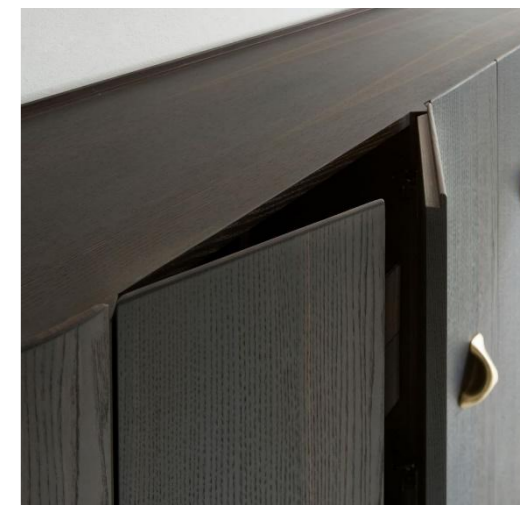

The hanging unit, characterized by soft lines, is designed for environments with an elegant atmosphere.

This sideboard is also available in the leaning version with thin, small brushed brass legs that support the wooden structure.

The brushed brass legs perfectly combine with Sesel bronze handles and with the precious Siberian ash wood essence.

Within a room, Collectionist is immediately visible and catches the attention of the observer thanks to its elegance and timeless design.

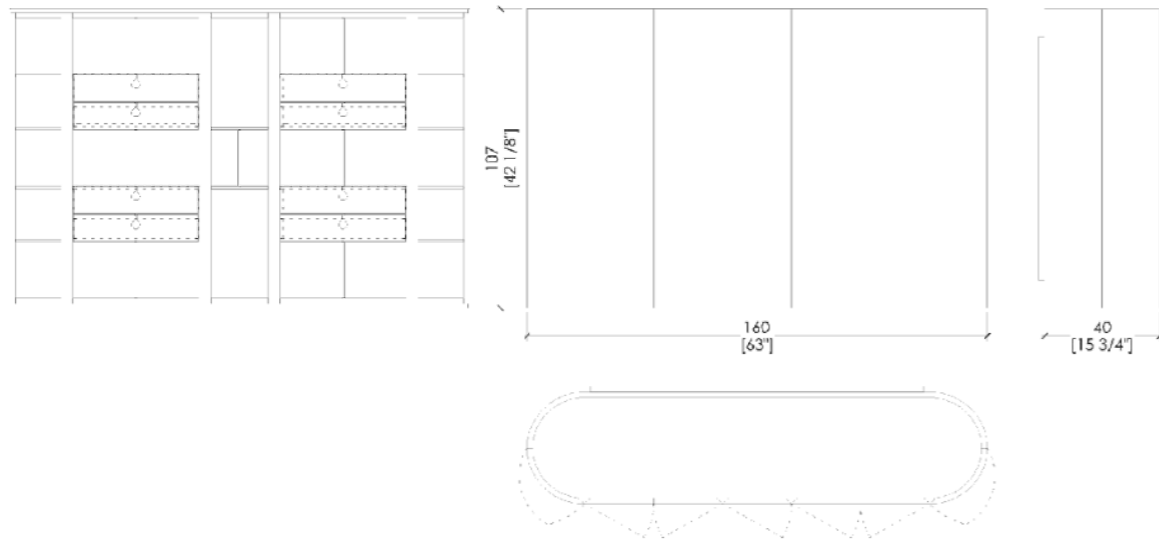

Even the tiniest detail reveals the exceptional ability of our craftsmen.
