INFINITY TABLE

LAURAMERONI
design . collection

Modular tables characterized by a base with a geometric design realized with a honeycomb lacquered structure and modular top that can also be configured combining marble, plain or lacquered wood.

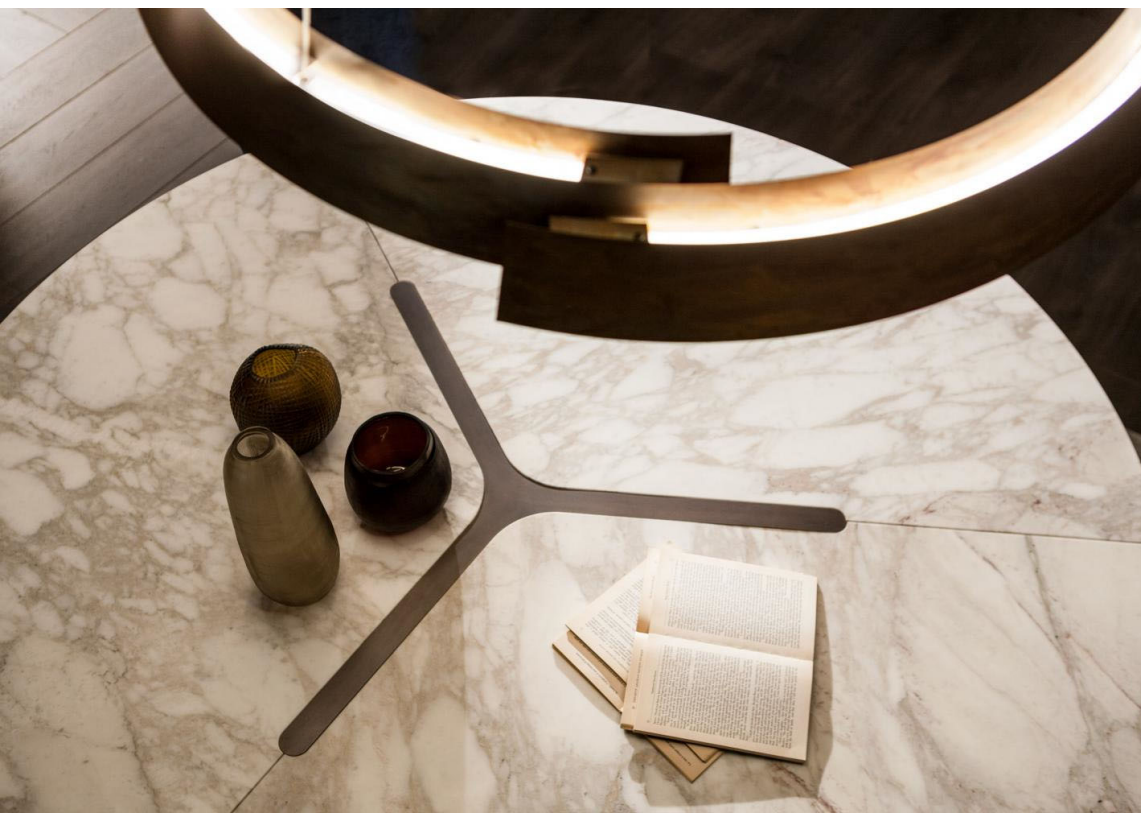

The "Infinity" table become the protagonist of the dining area thanks to the dialogue between the various precious materials in which they are proposed. The base has a unique design and presents a characteristic geometric honeycomb pattern.

The top is divided into segments and embellished with a central ornamental element. The choice of materials for the top part ranges from wood essences to the finest marble and lacquered woods.

The personalized combination of different materials makes each table unique and exclusive. Infinity is a table suitable for being placed in modern luxury homes and in offices of high representation.

The "Infinity" table in the round version strongly expresses its elegant design with a strong visual and aesthetic impact. The chromatic combination of the base and of the central ornamental decoration are perfectly combined with the top in "Calacatta Gold Marble".

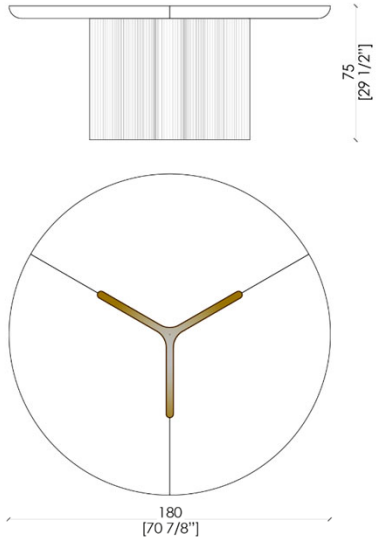

The preciousness of the plan is enhanced by the central decorative element. The triangular shape of the base is recalled on the central decorative element that outlines the inserts of the top creating an always new contrast.

"Infinity" is a unique table that becomes the true protagonist of the environment that hosts it, both domestic and public. The rounded line that characterizes the base is taken from the edge of the support surface. A detail that gives an elegant sinuosity and aesthetic continuity.

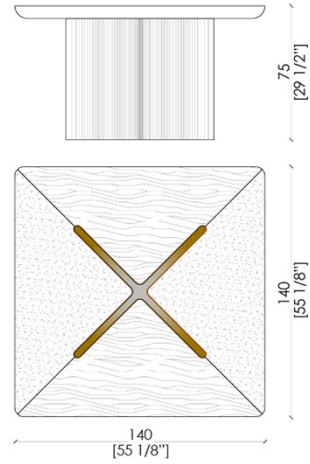

The combined inserts of the top in precious "Michelangelo Marble" and dark wood are outlined and defined but at the same time fused each other with the central decorative element. An original combination of elegance and uniqueness.
