LIGHTWALL - MODULAR LIGHTING

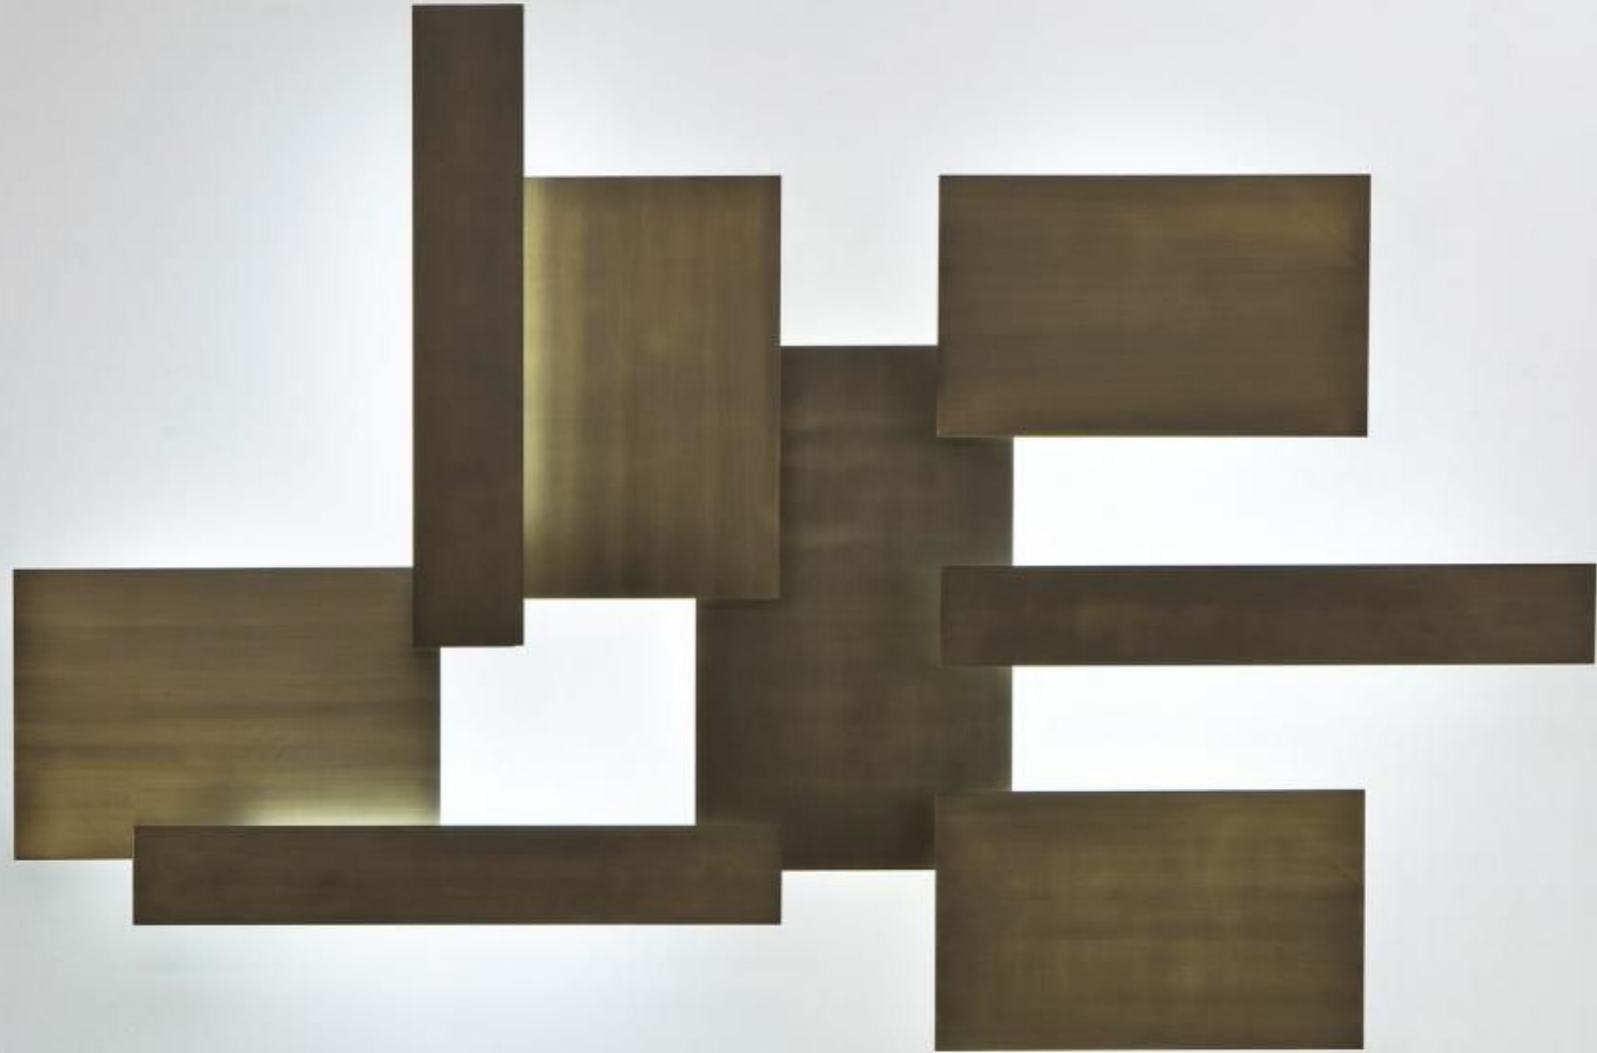

**LAURAMERONI**  
design . collection

A series of configurable panels and modules of different sizes, brass finished, brushed wood veneered.

The project proposes a series of varying size panels of different depths that can be placed together to create unique compositions.

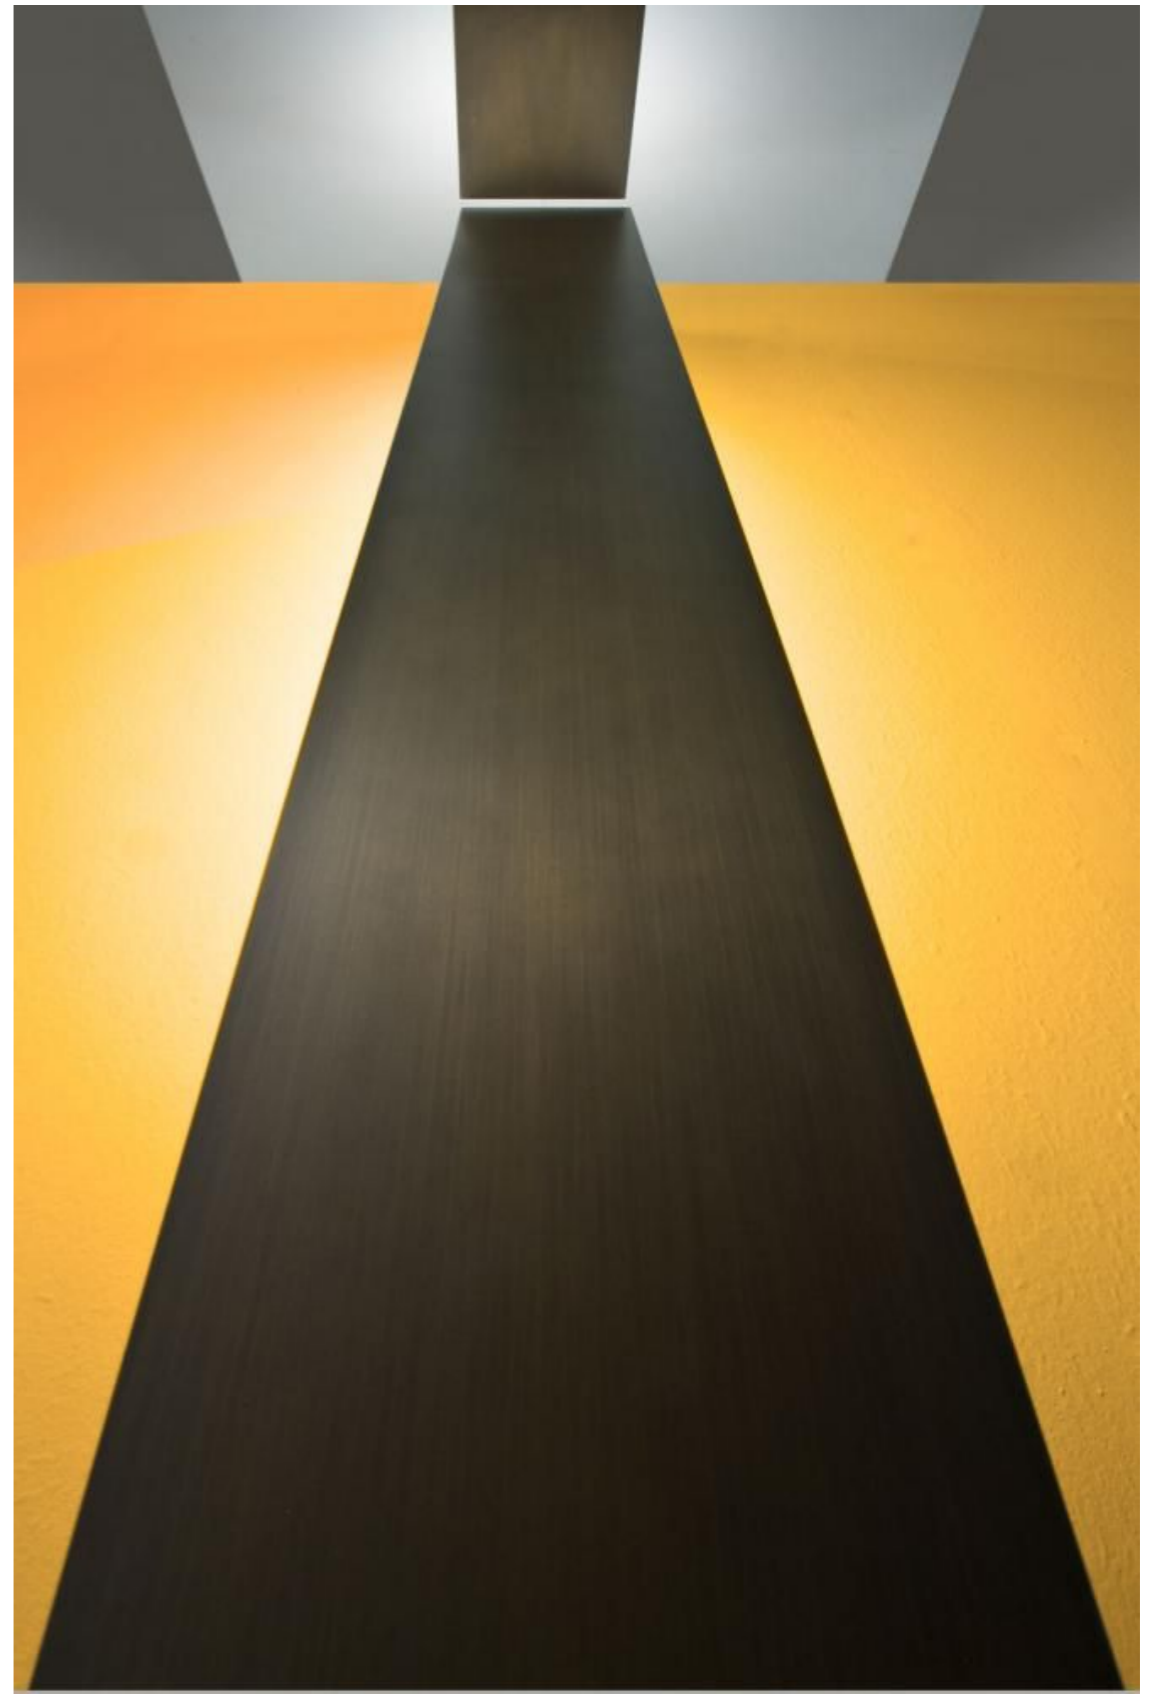

The aesthetics are driven by the strong materiality of the surfaces and the flexible compositional method. This system lends itself to both domestic and contract applications, because of its flexibility and strong materiality.

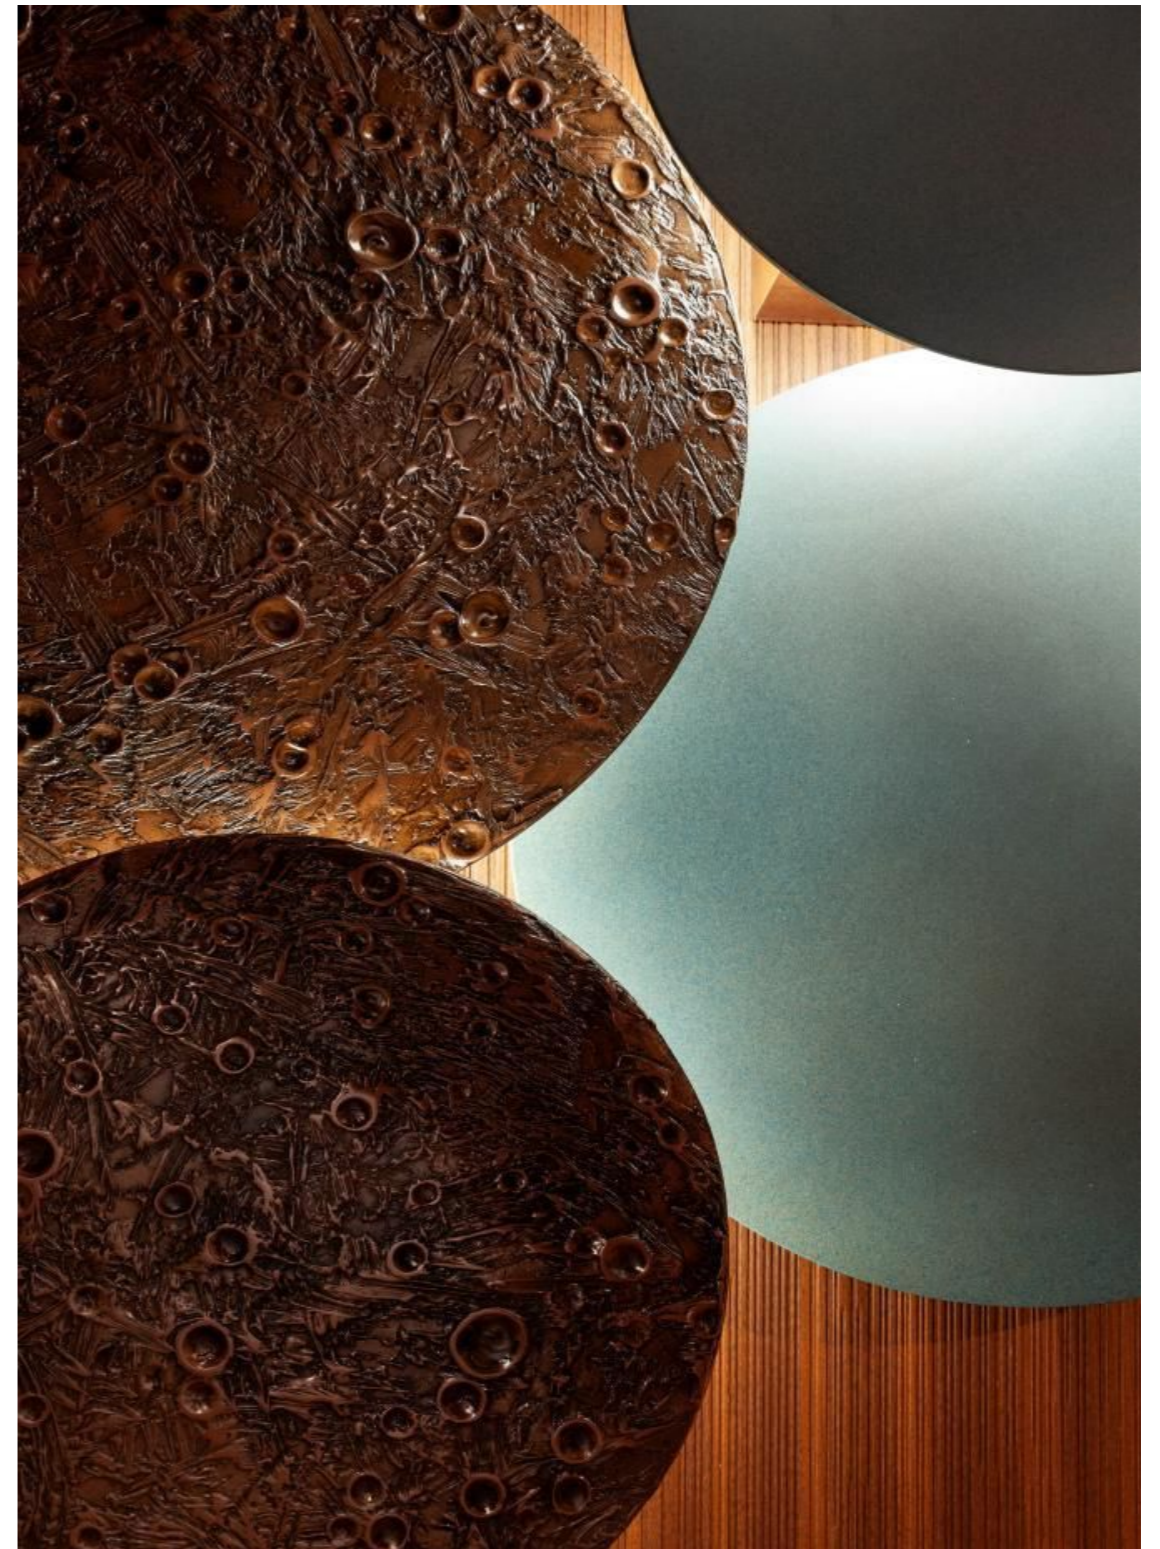

Light Wall is also available in Corteccia finish, liquid metal.

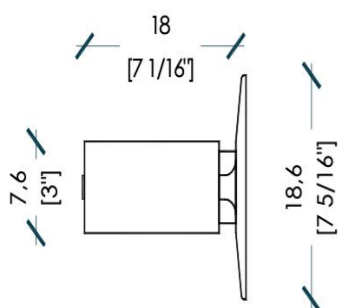

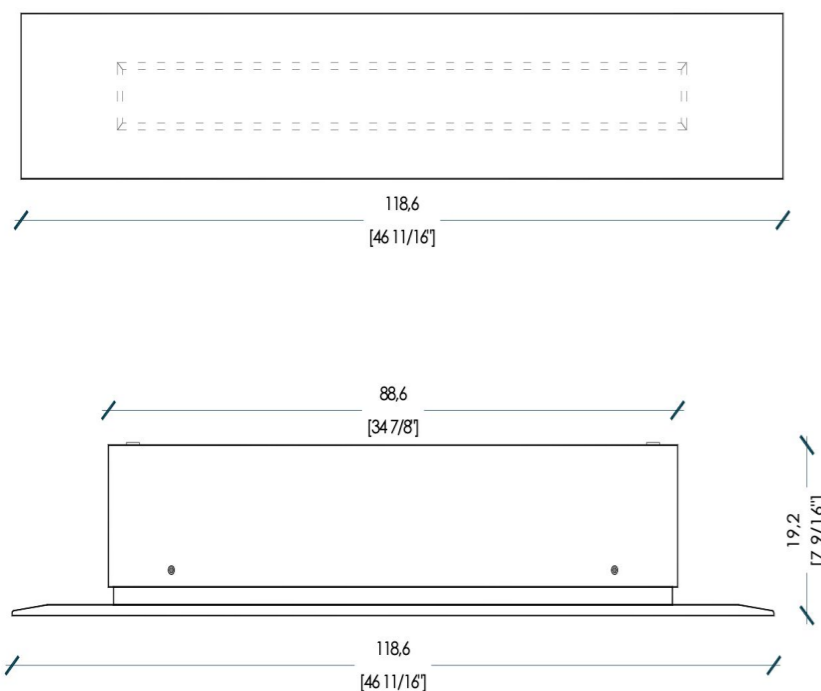

The LED lights behind the brass screens create a unique effect and a welcoming atmosphere. Light Wall is also available with the wood veneered front side, in all plain woods of the collection.
