LAURAMERONI
design . collection

Sideboard with wooden structure finished on both sides, to be equipped with modular elements. Structure available in all the sample book woods and in seven different compositions.

Modular elements with drawer can be made in all the sample book woods and in all RAL colors (brushed matt lacquered finish and glossy lacquered polyester).

Laurameroni produces numerous versions of the BD09 sideboard, giving the opportunity of combining different wood-essences and lacquering chosen by the customer. Thus, it is always possible to get pieces which are unique and hard to be reproduced.

Each element of the composition can be realized in a different finish, combining different wood essences and colors.

The choice to realize some of the elements with a glossy lacquered finish in different colors lends vivacity to the product.

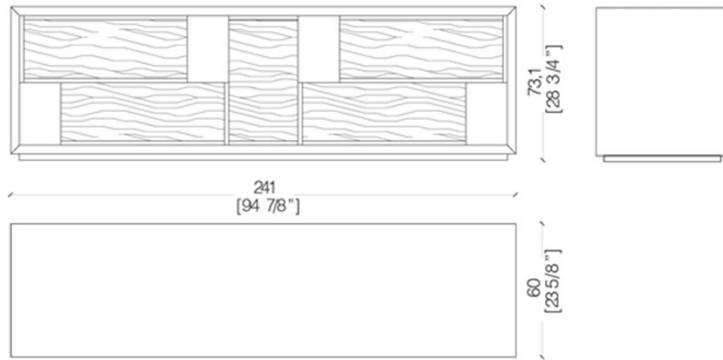

The customization is the key element of BD 09 dresser, which leaves creative freedom to architects and designers
