BAMBOO COLLECTION – BAMBOO LOW

**LAURAMERONI**  
design . collection

Lacquered or veneered wooden sideboards with sequences of decorative channels that mark the surface and accentuate the strong architectural design. Both the container and the channels are available in all RAL colors. The container structure can also be veneered in all the wood essences in the collection.

A collection of cupboards that fully interprets the high customization and craftsmanship in every little detail.

They are available in two variants: the version with an open compartment and the version with a sliding glass container element. It is possible to have the backside plain lacquered on all versions for easier wall mount. All the solutions give character and elegance to the home or simply wherever they are placed.

Equipped with two hinged and an internal shelf. All the internal structure of the sideboard is intentionally lacquered as the exterior to enhance the refinement and extreme care to details that contribute to creating a "be different be unique" product.

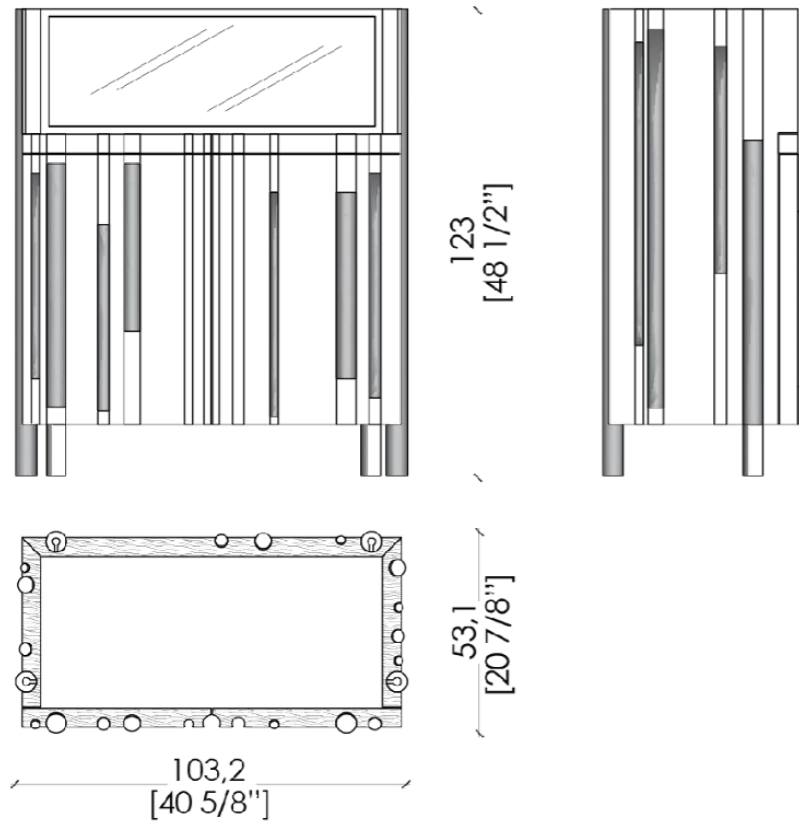

The different versions of the sideboards can be easily combined and interpreted for different uses.

The version with a sliding glass case becomes a display of collectible items and memories that are enhanced by the light bar incorporated in the back panel and by a leather-covered support plane.

Every detail has been designed to express the concept of luxury and elegance. Every aesthetic detail is the result of skilled craftsmanship.
