CARL TABLE

Coffee table with marble base, circular support in brass and glass top.

The brass tubular structure conceals a small light at the end that illuminates the bronze glass support surface and intersects with the Verde Guatemala marble base.

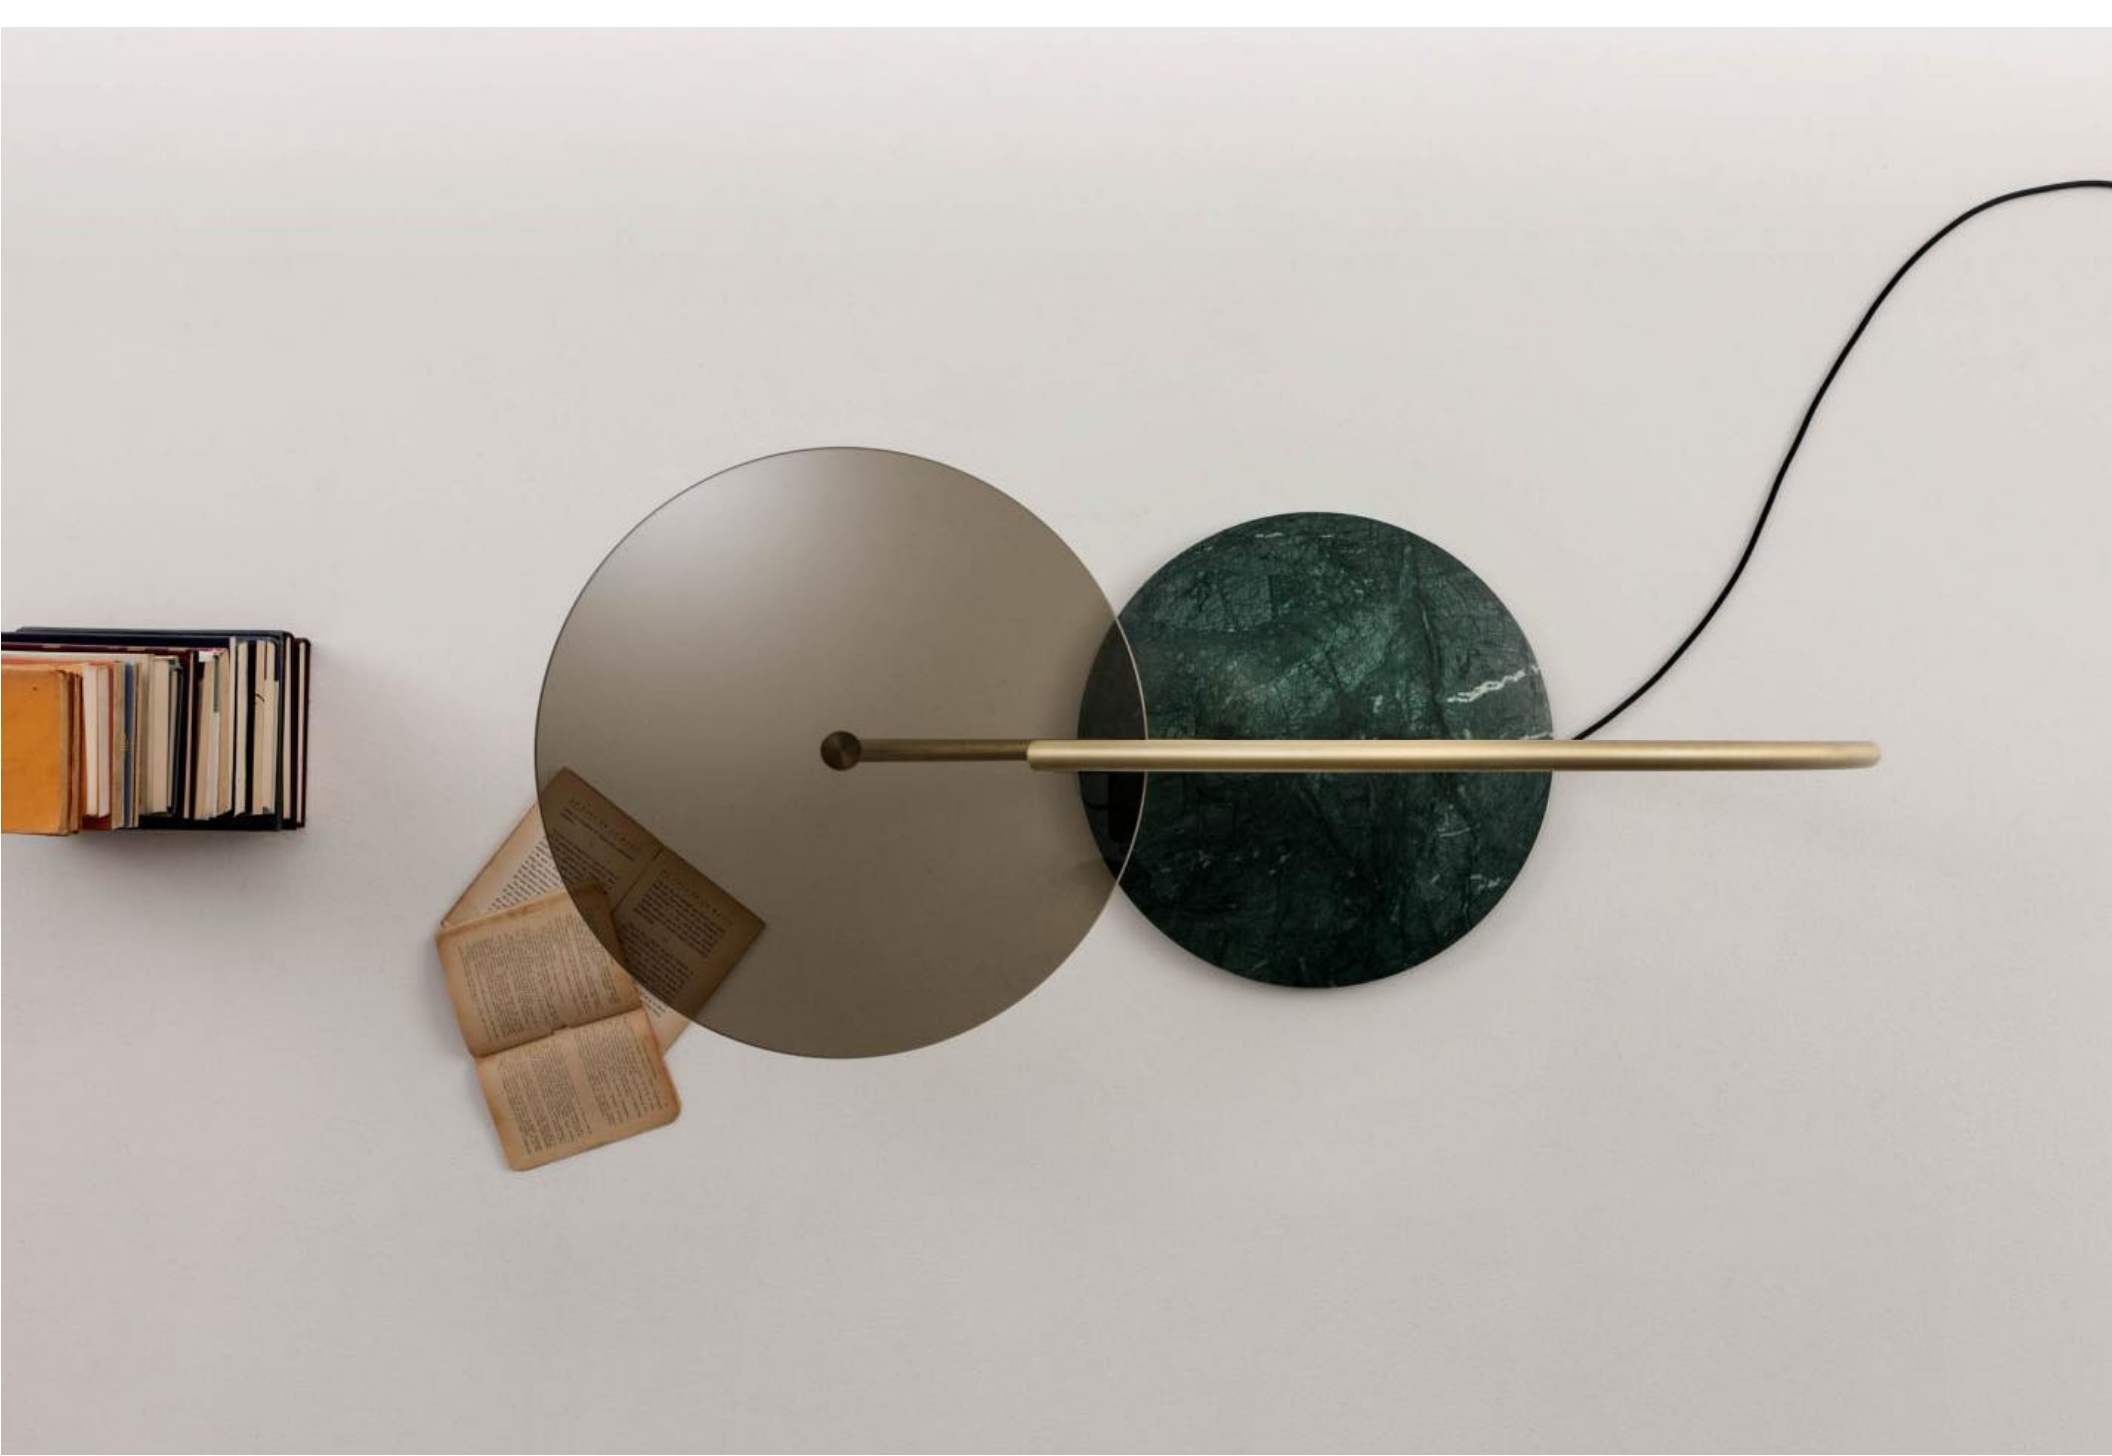

The combination of the slightly rounded Guatemala Green Marble base and the satin-finish brass tubular structure give elegance and originality to the table.

The small light hidden at the end of the tubular brass structure illuminates the Bronze glass top in a discreet and sophisticated way.

The table is a true sculpture with the support plane shifted in respect to the base which are joined together- as in a hug - by a circular brass structure.

Metal

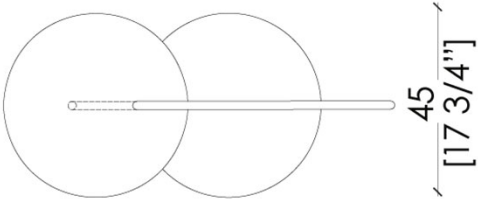

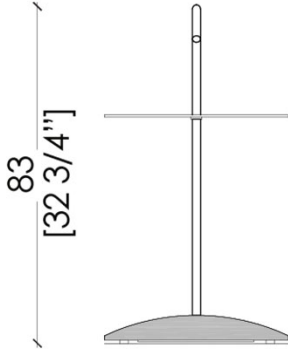

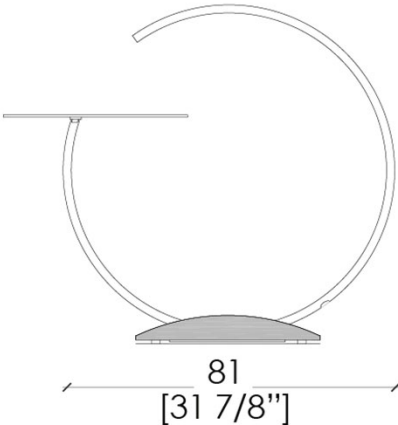

Satin Brass

Base

Verde Guatemala Levigato
