DÉCOR ACOUSTIC WALL PANELS

LAURAMERONI
design . collection

Wooden and textile soundproofing and sound absorbing wall claddings and doors with acoustic performances, designed by Bartoli Design for Laurameroni and engineered by Exhibo.

Decor Acoustic is the result of the combination between visible and invisible architecture and of a complete focus by Laurameroni on designing not just physical appearance but also acoustic experience; the objective being to offer interior decorations that sound as good as they look.

In the Decor Acoustic collection, Laurameroni's exclusive decor products and surfaces are greatly enhanced by superlative acoustics. Aesthetic and acoustic solutions are tailor-made based on the detailed requirements specified by the customer and the architectural space.

Decor Acoustic Wall Panels are available in all carved woods of the collection with vertical or horizontal carving. These panels are also available covered with fabric to create infinite combinations and adapt to different interior design projects.

The wall panels can be combined with metal, wood veneered or lacquered shelves to equip the wall in a functional way.

Decor Acoustic panels can be used in combination with all items of the Decor Collection as well as with doors.

Decor Acoustic is the perfect solution to create a quite atmosphere to relax or work in an acoustically comfortable environment. Even LED lighting can be integrated within fabric and wooden panels.

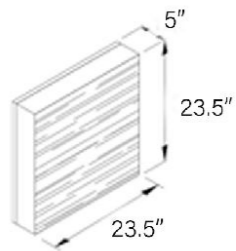

A shelving system can be installed in both wood and fabric acoustic wall panels.

The choice of a sophisticated design and of high-quality materials allows to obtain acoustic panels with high performances without renouncing to the elegance that distinguishes our production.
