SOTTSASS LOW TABLES

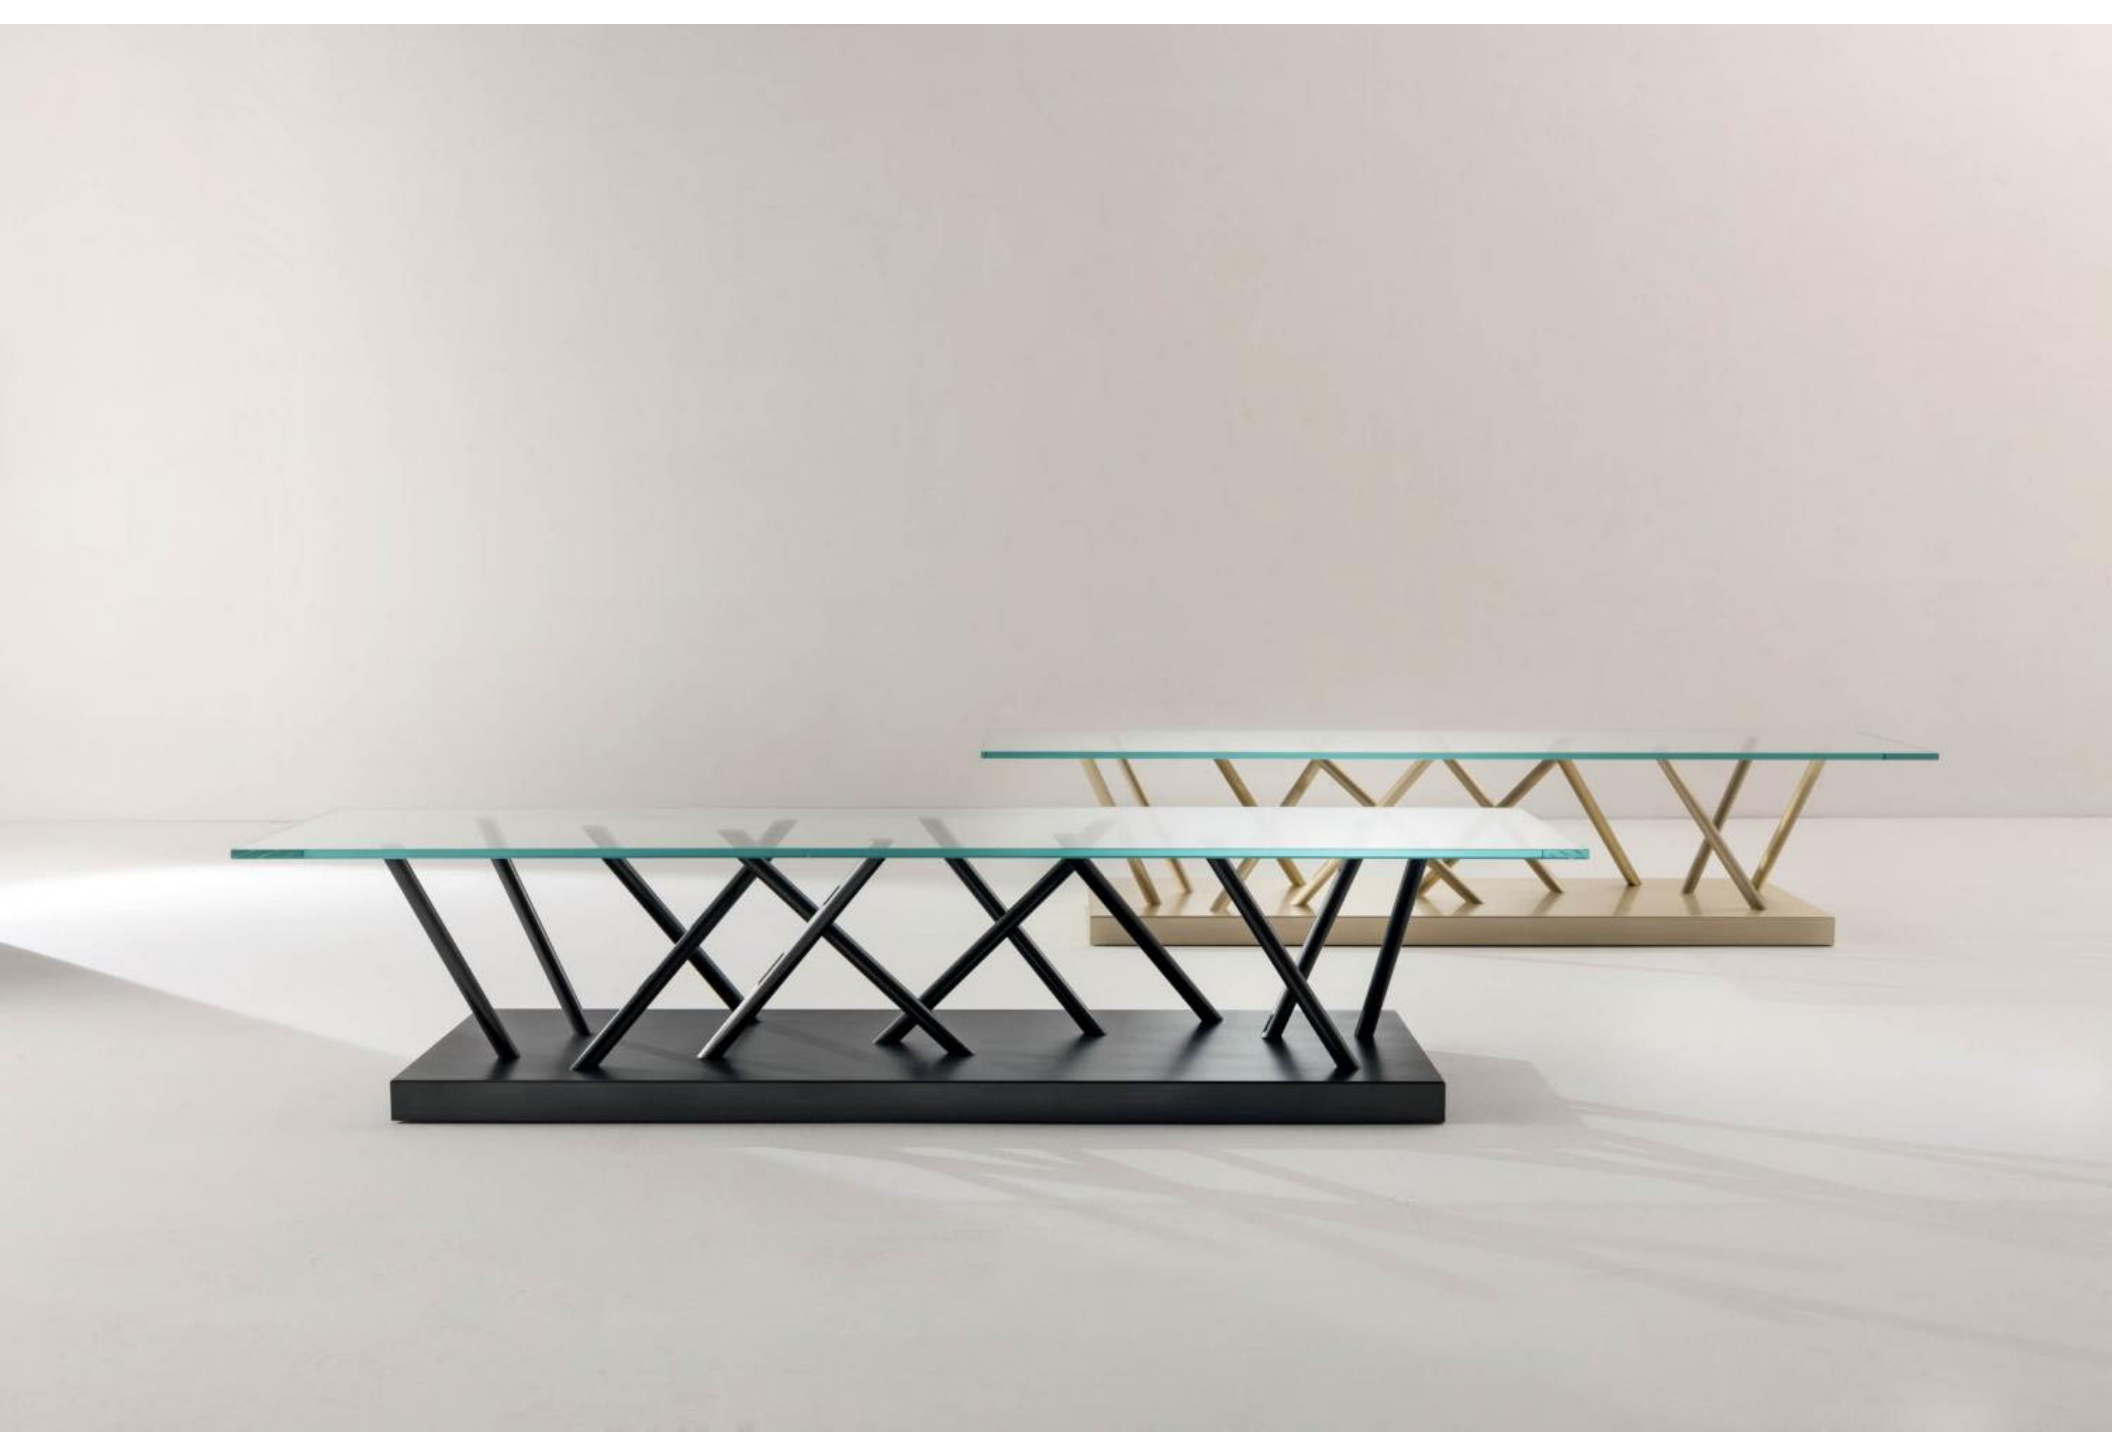

LAURAMERONI
design . collection

Low tables with bright steel structure with yellow double-glass top or transparent ultra-light glass top.

SA01, 04 and 05 are a set low tables designed by Sottsass Associati that emphasizes the lights effects thanks to the wise use and creative combination of glass and steel. They are not only functional tables, but elements of design to use in sophisticated spaces.

Low Table SA 04 combines to the steel structure a yellow dyed maple drawer.

SA 01 low table has a polished steel base that supports a crystal top, creating unique effects and interesting lights reflections.

Linear rigor and precision of details characterize SA 05 low table with a square steel base and an ultra-clear transparent top.

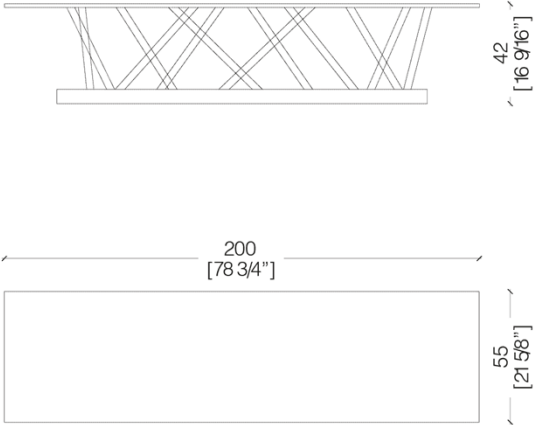

SA 04 combines the distinguishing steel base with the yellow dyed maple drawer and the crystal top in a perfect balance between forms and materials.

This low table, thanks to the choice of materials and colors, attracts the attention at first sight and is designed for luxury contemporary environments.

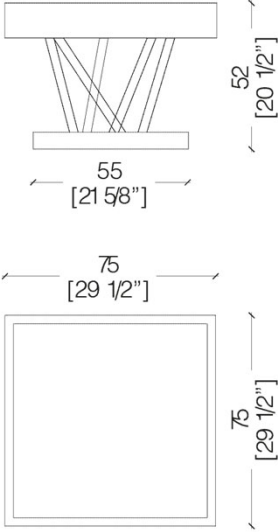

The distinguishing base structure with the multiple legs is a sculptural piece by itself: a blend of craftsmanship and creativity.
