SYMPHONY CABINET SYSTEM

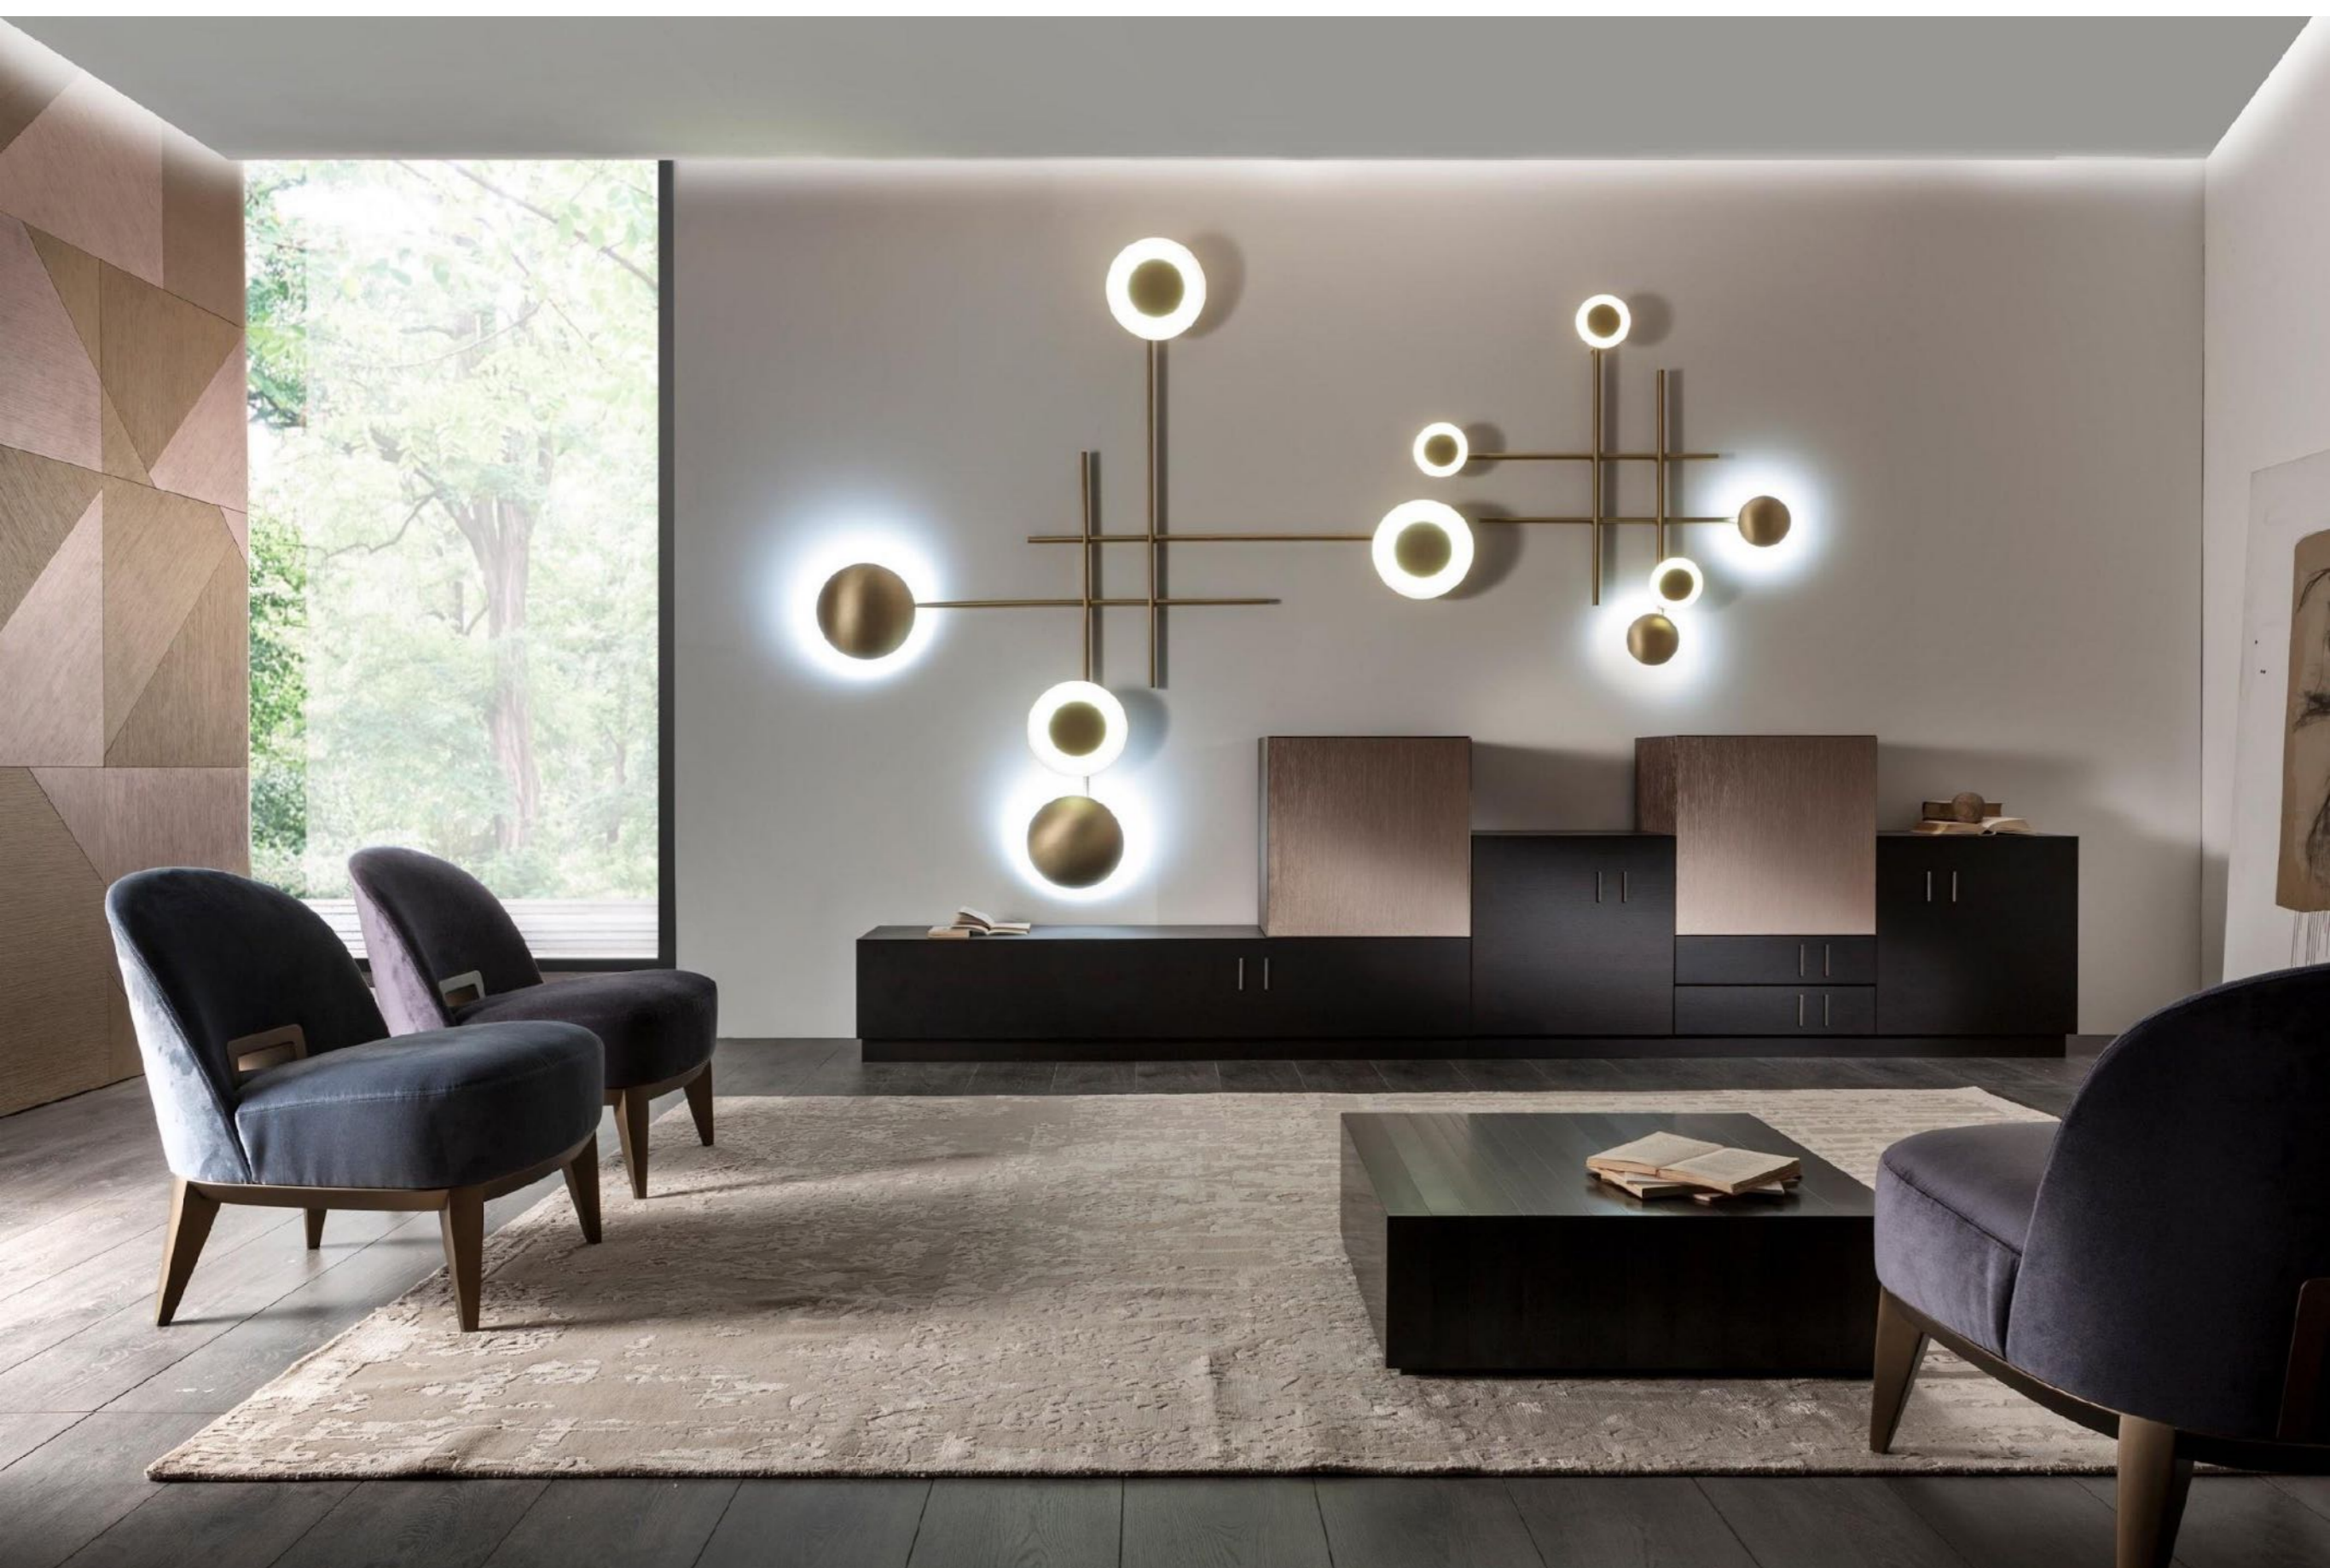

LAURAMERONI
design . collection

Modular storage system designed to accommodate the numerous Laurameroni finishes while maintaining simplicity and compositional flexibility.

The "Symphony" modular system is characterized by design flexibility guaranteeing a unique and different product, playing with the contrasts of the various finishes and textures proposed.

Depending on the modules used, various furnishing solutions can be composed: storage units, TV cabinets, sideboards, furniture and counters indicated for exclusive lounge bars.

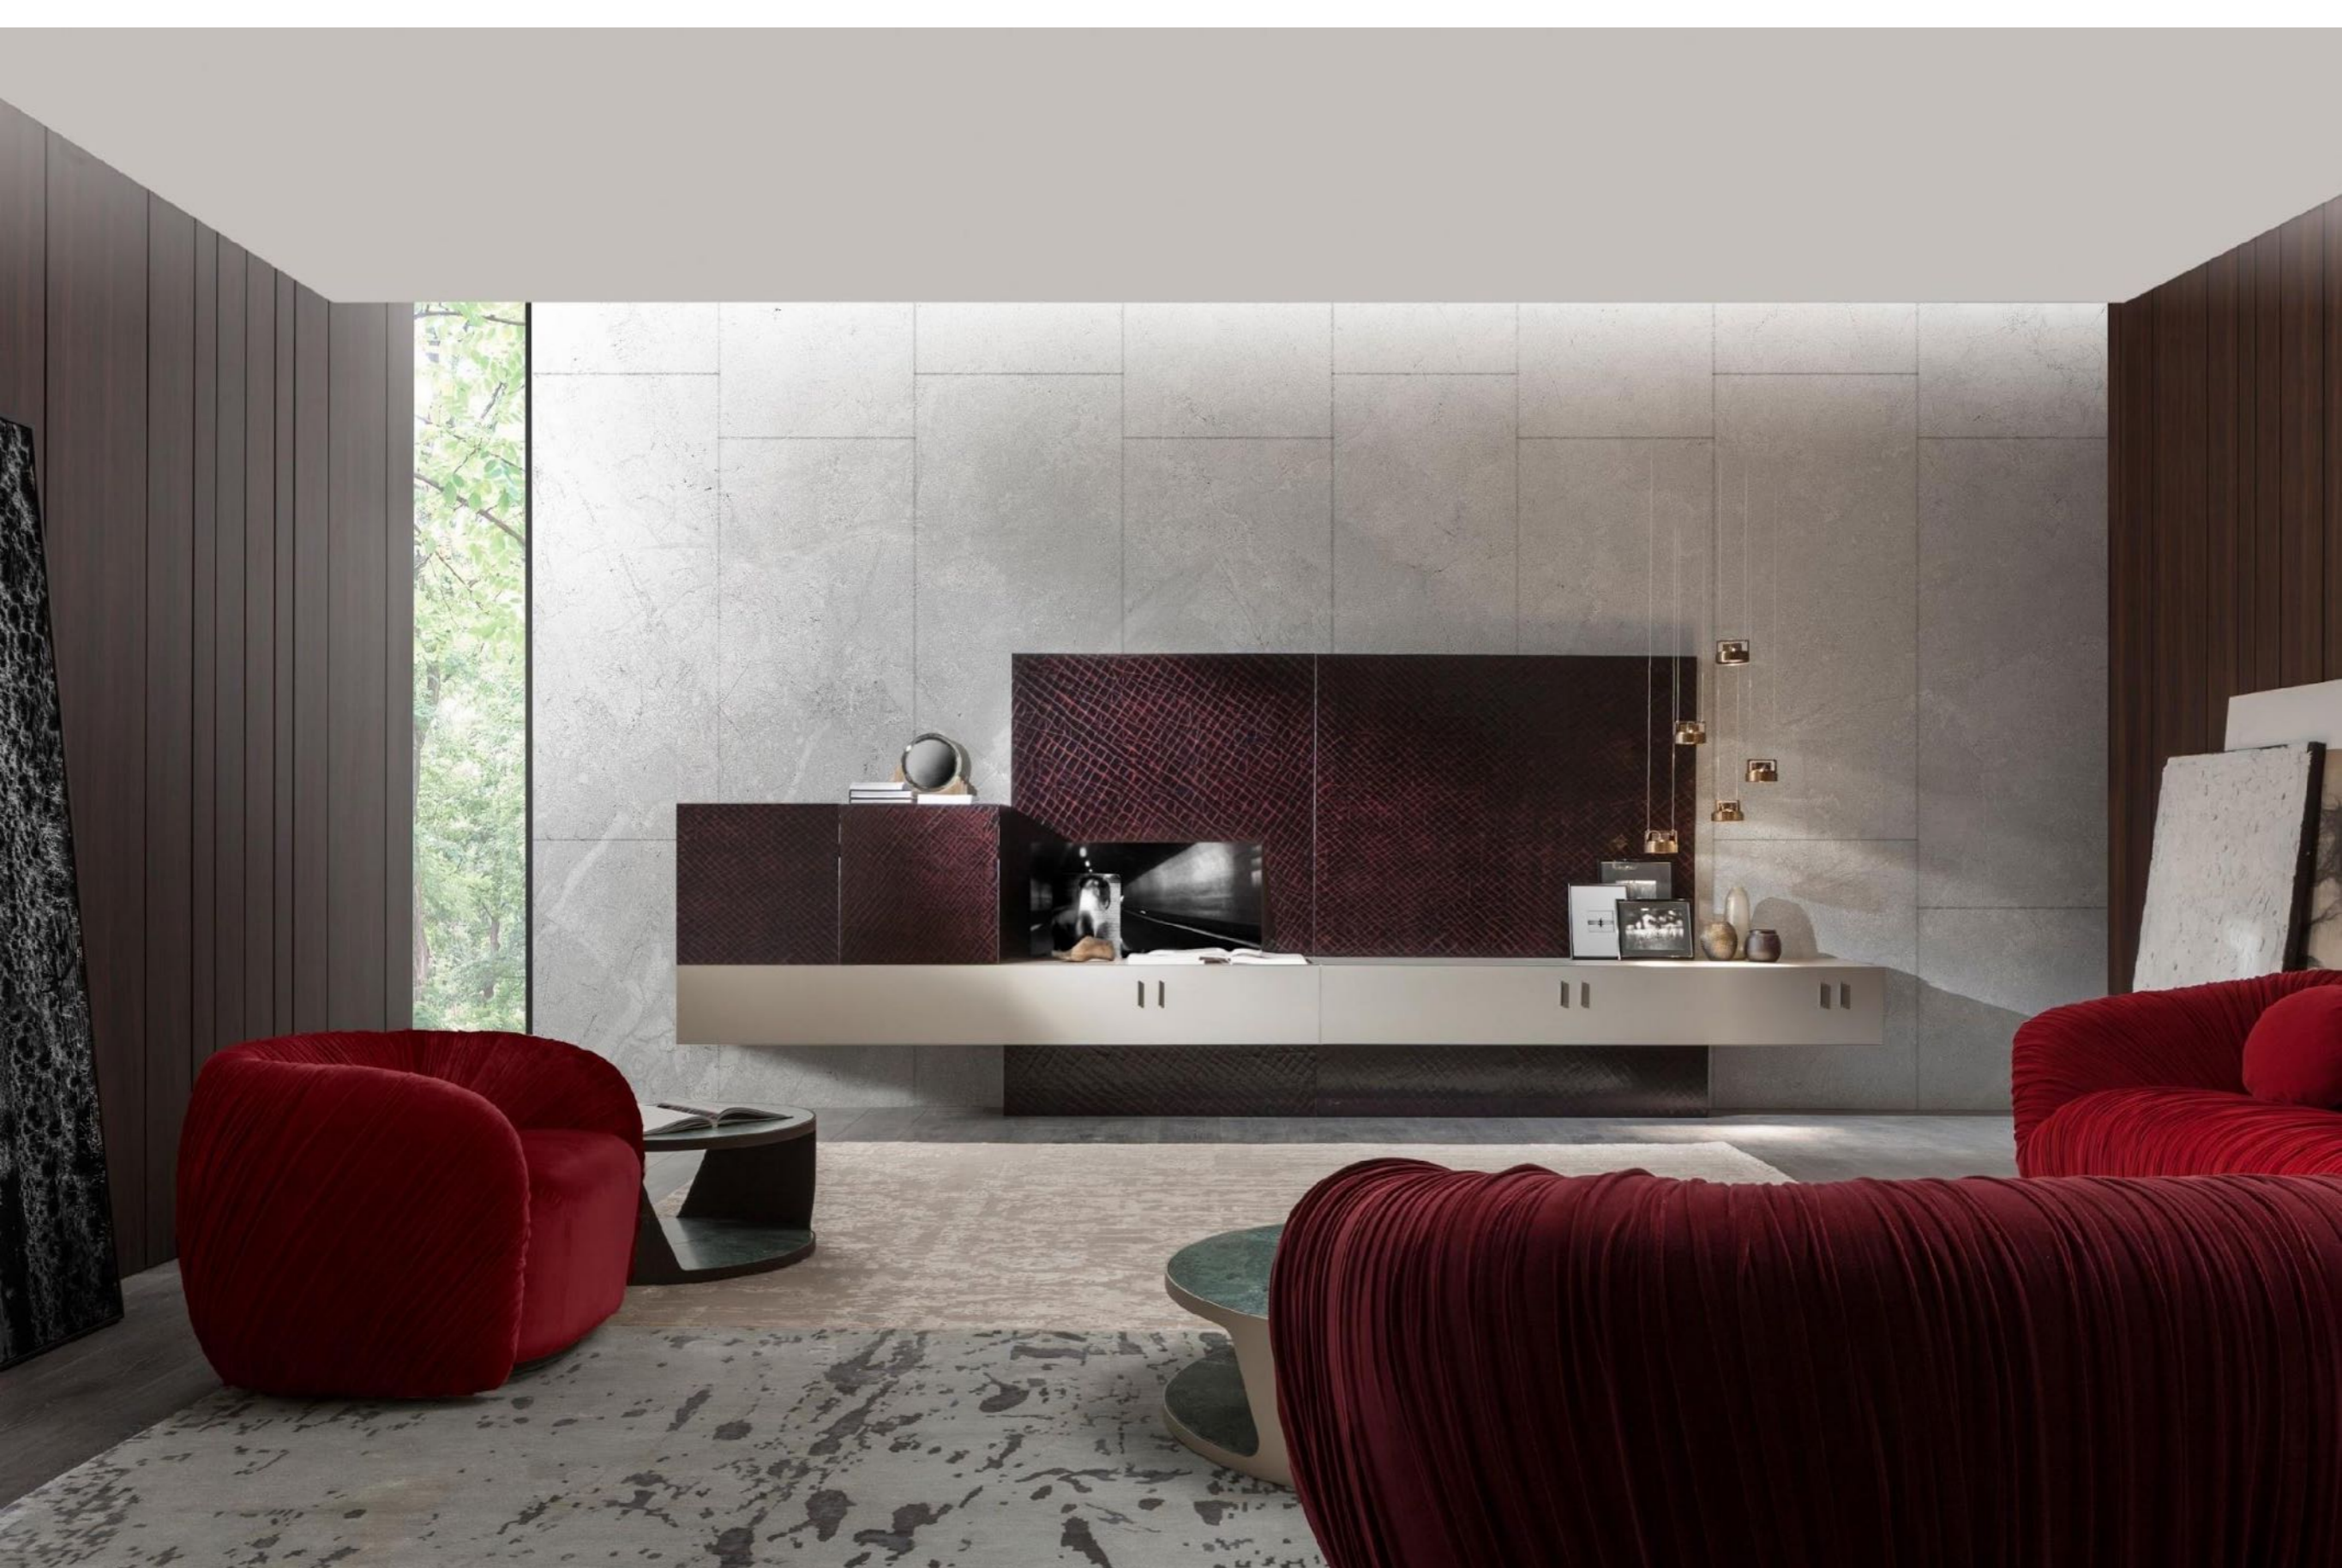

The "Heat Treated Oak" finish combined with the Tatami Bronze texture enhances the contrast. The high modularity and flexibility of this modular program adapts to the needs of space and differentiated containment.

The compositional scheme includes containing elements of different heights (with doors or with drawers) that can be combined with each other and that through the combination of different finishes help to create a combination of aesthetic elegance and great practicality.

The 45° cut of the doors and the handle carved on the side of the wall units in the Tatami Bronze finish are details that confirm the aesthetic importance that Laurameroni researches in every product of his collections.

The great flexibility of the "Symphony" modules and the vast choice of matching materials can be used to create exclusive furniture and bar counters for socialization and leisure.

Hanging compositions, wall panels and containing elements of various shapes and sizes combine each other, outlining a refined space.

This composition combines "Guatemala Green Marble" with the bronze "Tatami" texture.

The new "Rift" finish in detail: a lacquered surface reminiscent of "craquelé workmanship", a technique used in the past to enhance the cracks left by the aging of the paint applied to the product. LauraMeroni interprets it in a modern way making it sophisticated.

The millimetric precision of the joints between the vertical and horizontal surfaces of the thin marble slab is worked by the expert hands of our craftsmen.

The brass handles of the containers and drawers have been designed exclusively for Laurameroni.
