TANGO – STORAGE UNIT

LAURAMERONI  
design . collection

Set of cylindrical containers with a diameter of 50cm/19.68" and realized in three heights.

"Tango" is a set of containers born from the research on the counterpoint of proportions, diagonals and volumes. The two rhythms of helical bands that surround the cylinders are inspired by the mooring poles of the boats on Lake Como.

The containers enclose an internal organization in circular glass tops, with mirror-polished steel accessories that multiply the geometries in a game of reflections.

Tango units includes a hinged door and lacquered wooden body with "Lacca 61" in 4 different colors or monochrome brushed lacquered.

The steel handle that runs the full height of the containers and the interiors illuminated by soft lights located in the base and in the top part create a pleasantly refined atmosphere.

A set of cylindrical containers that, thanks to the special lacquering of the multi-colored helical lines that characterize them, allow a refined setting in spaces of any size and for different purposes.

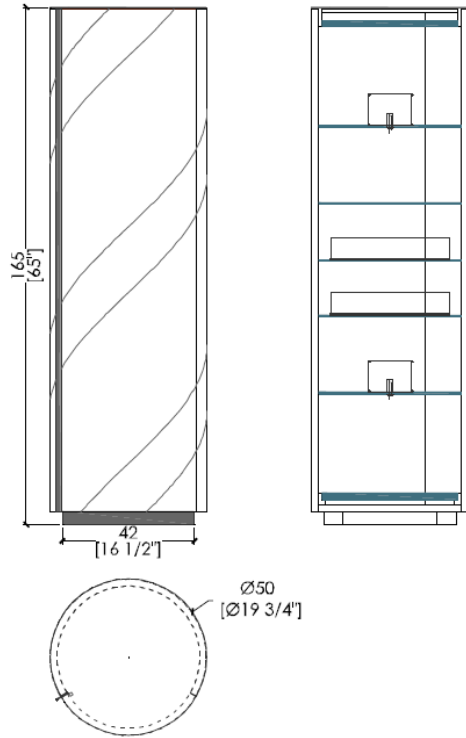

Every detail of "Tango" has been carefully studied to harmonize and make their setting of great aesthetic impact. The top and the base are in steel, like the elegant full-height handle and some of the details of the internal equipment.

An internal organization that includes circular glass shelves with the application of a revolving separation element in mirror polished steel, trays with leather backdrops and lighting inserted in the bottom and in the top part. All these elements combine to create a play of reflections and multiply the geometries.

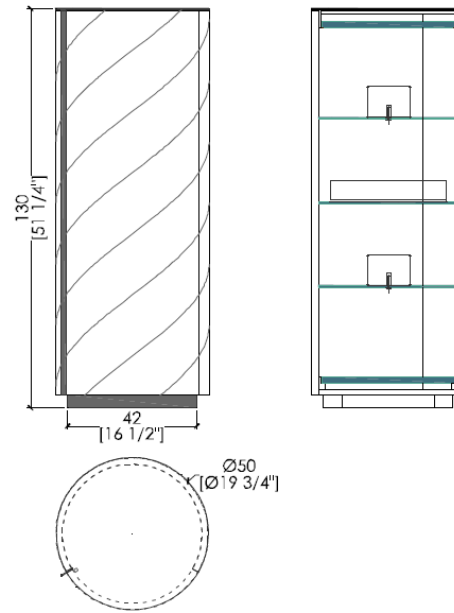

A real architectural jewel designed to be set in elegant and representative spaces.

The inside of the containers is entirely finished.
